## **EPB Fiber Optics Services Now Available to More Homes, New Areas**

CHATTANOOGA, Tenn. - EPB announced today that their 100% Fiber Optic services are now available to 10,000 more homes, some located in areas of Chattanooga where services were not previously available. New areas to have access to EPB Fiber Optics services include portions of Brainerd and the Belvoir area, where over 3,000 homes now have services available, as well as parts of Lupton City, Ashland Terrace, and Highland Plaza.

EPB Fiber Optics has also expanded its availability to more homes in East Ridge, Red Bank, and areas of the city of Chattanooga including Alton Park, St. Elmo, Jefferson Heights, Southside, Oak Grove, Highland Park and North Chattanooga. Today's announcement follows last month's launch, when services were made available to more than 17,000 homes.

"With the overwhelming response we've received, we know that customers are anxious for the opportunity to experience our 100% Fiber Optics network," says Katie Espeseth, Vice President of EPB Fiber Optics. "That excitement in our community is the reason we are working hard to make services available to as many homes as possible, as quickly as we can."

EPB customers can expect to receive EPB Fiber Optics mailers and door hangers when services are available at their home. Customers can also check to see if services are available at their home by visiting [www.epbfi.com](http://www.epbfi.com) or by calling 423-648-1EPB (1372).
